

FOR IMMEDIATE RELEASE - AUGUST 9, 2010

FUTURECEUTICALS® RESEARCH OF ARCHAEA ACTIVE™ RESULTS IN UNPRECEDENTED ENDORSEMENT

Dallas, TX — EvolvHealth, LLC is pleased to announce an update on the continued research of the Archaea Active™ formula being conducted by FutureCeuticals®. The second phase of studies, which included *ex vivo* bioactivity testing of the formula, demonstrated that Archaea Active™ does promote oxygen metabolism and increased ATP production with no associated undesirable increases in lactic acid levels or free radical production. Researchers are not aware of any other supplement or formula, to date, that has the same potential benefits with no known negative effects.

“Increased oxygen uptake without the side effects connected to lactic acid or free radical production is a breakthrough,” says Dr. Newman, renowned researcher.

The *ex vivo* testing was conducted by FutureCeuticals® using Seahorse Technology as well as their branded TargeTest™ protocol. The Archaea Active™ formula produced measurable *ex vivo* bioactivity when subjected to the bio-analytical platform.

John M. Hunter, General Manager of FutureCeuticals®, recently announced that due to the continued positive discoveries surrounding research of the Archaea Active™ formula, FutureCeuticals® can now officially endorse the Archaea Active™ proprietary formula found within the Evolv product for its demonstrated *ex vivo* bioactivity.

“For the first time in our history, we are awarding the FutureCeuticals® TargeTest™ seal of approval to a product we do not manufacture,” said Mr. Hunter. “We have been consistently impressed with the way the Archaea Active™ formula has provided encouraging results while being subjected to the most rigorous, cutting-edge bio-analytical screenings available. As we execute our very carefully designed bio research on Archaea Active™, we look forward to moving into the clinical setting with this technology.”

EvolvHealth, LLC - Committed to Helping People “Evolv”

Trey White, Chairman and Co-Founder of EvolvHealth, LLC says, “With years of product consumption and thousands of anecdotal testimonials behind it, the Archaea Active™ formula was clearly a special product. We are excited about the results from the latest study and are elated that the continued research is confirming what testimonials have been reporting for many years. The FutureCeuticals endorsement of the Archaea Active’s *ex vivo* bioactivity is further proof that the Archaea Active technology is not only unique but a breakthrough technology.”

About Dr. Robert Newman

Dr. Robert Newman, a renowned medical researcher and Professor Emeritus at The University of Texas M.D. Anderson Cancer Center in Houston, has agreed to consult in regards to further testing of the proprietary Archaea Active™ formula. Dr. Newman, currently Chief Science Officer (CSO) at a major New England nutraceutical company, will advise on future testing procedures, as well as review and analyze test results from outside independent labs.

Dr. Newman's career has been dedicated to the development of novel therapeutic strategies to improve the quality of life for patients with inflammatory and malignant diseases. His research efforts in several scientific disciplines are nationally recognized, including in the fields of pharmacology, analytical chemistry, drug development, and clinical pharmacology. His work has resulted in more than 300 peer-reviewed publications.

About FutureCeuticals®

FutureCeuticals® is a vertically integrated bio-technology company and raw material supplier specializing in the discovery, development, manufacturing, processing, growing, and marketing of scientifically innovative nutraceuticals, functional foods, probiotics and cosmetic ingredients. The company's state-of-the-art facilities cover over 2 million square feet of manufacturing space, and include manufacturing locations in Illinois, Wisconsin, California and Europe, as well as a new bio-research laboratory facility in Irvine, California. The facilities encompass full-production and scale-up lines, two quality assurance labs, an HPLC, TLC, GCMS, FTIR reference lab, and a knowledgeable staff of doctoral-level scientists. The Company processes over 60 million pounds of non-GMO fruit, vegetable and grain-based ingredients every year. Privately held and family-owned, FutureCeuticals® is a sister company to Van Drunen Farms (www.vandrunenfarms.com). More information is available at www.futureceuticals.com.

About EvolvHealth, LLC.

EvolvHealth is a direct sales consumer health company headquartered in Dallas, Texas. Its purpose is to help people improve their family's physical and financial well-being through science-driven products and entrepreneurial opportunities.
